To Whom It May Concern,

I am pleased to recommend Dante Warhola for any future academic or professional opportunities in the field of information technology. Dante served as an IT intern under my supervision at Topp Business Solutions, where he consistently demonstrated professionalism, technical aptitude, and an eagerness to learn.

From day one, Dante approached every task with a strong work ethic and a proactive mindset. He quickly adapted to our technical environment, assisting with tasks such as workstation setup, software deployment, network troubleshooting, and user support. His ability to absorb new information and apply it effectively was impressive, often completing assignments ahead of schedule and with minimal oversight.

Dante also exhibited excellent problem-solving skills and attention to detail. Whether diagnosing hardware issues or helping implement cybersecurity measures, he was able to follow best practices while still thinking creatively to find efficient solutions. His positive attitude, reliability, and collaborative nature made him a valued member of our IT team.

I am confident that Dante will continue to excel in any role he pursues. He has the technical foundation, adaptability, and professionalism to contribute meaningfully to any organization. I strongly recommend him without hesitation.

Respectfully,

Brandon Coletti, CSIS
