

Re: Executive Recommendation for Dante Warhola

To whom it may concern,

I am pleased to provide this formal recommendation for [Dante Warhola](#), whom I observed during his Cybersecurity Internship with DICK'S Sporting Goods from May to July 2026. In that capacity, Dante demonstrated the judgment, discipline, and business-oriented thinking I would expect from an emerging cybersecurity professional operating in a complex enterprise environment.

Dante's work centered on assessing enterprise data exposure risks associated with external file-sharing platforms, AI tools, and browser extensions accessible from company devices. He evaluated approximately 2,000 applications, identified 80 previously untracked tools, and developed a risk-tiering approach that translated a broad and ambiguous technology landscape into actionable security insight.

Equally important, Dante demonstrated sound operational judgment. He worked with stakeholders to move findings from analysis into enforceable controls, including support for blocking high-risk AI capabilities where appropriate. That connection between risk identification, business context, and control implementation is essential in a mature cybersecurity organization.

Dante also communicated effectively with leadership. He developed a dashboard to provide ongoing visibility into tool usage and risk exposure, then presented his findings and governance recommendations to cybersecurity leaders in a clear and business-relevant manner. He showed the ability to translate technical detail into decision-useful information.

Throughout the internship, Dante earned credibility through curiosity, professionalism, and follow-through. He asked thoughtful questions, sought to understand the broader security and business implications of his work, and consistently demonstrated maturity beyond what is typical for an intern.

I recommend Dante without reservation. He has the judgment, initiative, communication skills, and technical foundation to contribute meaningfully in security engineering, cyber risk management, governance, risk and compliance, or related cybersecurity roles. I am confident he will continue to develop into a highly capable cybersecurity professional and would be an asset to any organization.

Respectfully,

Michael L. South

Vice President & Chief Information Security Officer
DICK'S Sporting Goods & Foot Locker
